

# Weekly Report

Lu Junhua

2016 年 5 月 8 日

## Done

- Finished the review comment. I did not realize that the paper is VIS paper for its too short and with authors' names on it. I found many bugs and problems in the paper after re-reading it, and communicated with Prof. Wu about the problems.
- Finished a completion of edutainment paper and submitted.
- Wrote python code and report for homework 1 of applied mathematics of computer science.
- MISCELLANEOUS went to T-GRAM company; checked several times that *Frontiers of Computer Science* had not give any feedback to me;

## To do

- Learn JavaScript; Finish more homework of AMCS.
- Read papers: PacificVis2016: A Visual Analytics Approach to High-Dimensional Logistic Regression Modeling; prepare for next weeks' group meeting report
